

## **Innovations in Nuclear Workforce Training: An Industry-Focused Approach for Developing the Next Generation of Skilled Nuclear Workers**

### **Executive Summary**

The objective of the project is to develop new courses and adapt existing classes for a new Nuclear Engineering Technology Associate Degree program. The program will benefit students by preparing them for high-paying, high-demand jobs; the nuclear industry by providing well-qualified trainees for non-licensed operations and maintenance positions; and Augusta Technical College by building a program that enhances the College's instructional capacity.
